SYNTHETIC CAPSTONE REVIEW GUIDANCE - NOT MEDICAL ADVICE.

Glucose fasting-status documentation review

Glucose with unknown fasting status: ask the reviewer to verify and document fasting status before interpreting the supplied reference range. This fictional rule supports documentation review only.

Synthetic page 1.

SYNTHETIC CAPSTONE REVIEW GUIDANCE - NOT MEDICAL ADVICE.

Missing reference-range documentation review

Missing reference range for a laboratory finding: ask the reviewer to obtain the original laboratory interval and record its source before comparing the result. Do not infer an interval.

Synthetic page 2.

Mismatched-unit documentation review

Mismatched units for a laboratory finding: ask the reviewer to verify the reported result unit and the original laboratory interval unit before comparison. Do not convert or guess units.

SYNTHETIC CAPSTONE REVIEW GUIDANCE - NOT MEDICAL ADVICE.

Medication-uncertainty documentation review

Medication uncertainty: ask the reviewer to reconcile the recorded medication name, dose field, and frequency field against the original record. This is a documentation check only.

Synthetic page 4.

SYNTHETIC CAPSTONE REVIEW GUIDANCE - NOT MEDICAL ADVICE.

Allergy-verification documentation review

Incomplete allergy verification: ask the reviewer to verify and document the allergy history from the original record. Preserve whether verification remains incomplete.

Synthetic page 5.

SYNTHETIC CAPSTONE REVIEW GUIDANCE - NOT MEDICAL ADVICE.

Missing-follow-up documentation review

Missing follow-up: ask the reviewer to verify whether a follow-up plan was recorded in the original record. Do not treat not recorded as evidence that no plan exists.
